Lubbock, TX 79409

Dear Michael:

Please accept my sincere appreciation for hosting our Research Open House guests in the SORCER Laboratory on February 22. Please also convey my thanks to Daniela Incezan, Adam Turner, Adam Thomas-Murphy, and Fajin Wang for their willingness to explain the research that happens in this laboratory.

It was good to have the chance to showcase the important work done in the college, and to illustrate to students what options are available for their future. I'm excited to think of this next generation of engineers and what they might accomplish for the good of our world. Thank you for joining me in this endeavor.

Sincerely,

Pamela A. Eibeck, PhD, PE
Dean
